Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the terms **JIS Z0208** and **JIS P8117**, which are not defined in the specification. It is noted that applicant has attempted to overcome this objection by including the definition JIS. Nevertheless, in order to overcome this objection, applicant must provide the actual details of the method for which the above-mentioned terms stand. This is necessary because over time standards change.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1, 6, 8, 9, and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daneshvar (5,205,282) in view of Mitra (5,890,486). Daneshvar discloses substantially all of the claimed limitations, such as a mask (figs. 1-3) including a heat/steam generating unit 24, temperature buffer 59 (col. 3, lines 16-24) and inhalation/exhalation valves (figs. 3, 10, and 11). Daneshvar does not specifically recite the heat-generating unit being by exothermic chemical reaction having salt water and metal, and including oxidation. Mitra teaches an apparatus including heat generating unit being by exothermic chemical reaction (col. 8, line 45 – col. 9, line 20) having salt water and metal, and including oxidation reaction (col. 9, lines 24-33), so as

to provide nasal therapy. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to have incorporated Mitra's teaching of an apparatus including exothermic chemical reaction having salt water and metal, and including oxidation reaction into the invention disclosed by Daneshvar, so as to provide for nasal therapy.

Response to Arguments

6. Applicants' arguments with regard to the rejected claims, filed March 18, 2003, have been considered, but are moot in view of new grounds for rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alfred Basichas whose telephone number is 703 306 3476. The examiner can normally be reached on Flexible.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 703 308 0101. The fax phone numbers for the organization where this application or proceeding is assigned are 703 872 9302 for regular communications and 703 872 9303 for After Final communications.
